STATEMENT OF MANAGEMENT RESPONSIBILITIES

Management has prepared and is responsible for the interim condensed financial statements and related notes of the Novosibirsk Social Commercial Bank "Levoberezhny" OJSC ('the Bank'). They have been prepared in accordance with International Financial Reporting Standards and necessarily include amounts based on judgements and estimates by management.

The Bank maintains internal accounting control systems and related policies and procedures designed to provide reasonable assurance that assets are safeguarded, that transactions are executed in accordance with management's authorisation and properly recorded, and that accounting records may be relied upon for the preparation of financial statements and other financial information. The system contains self-monitoring mechanisms that allow management to be reasonably confident that controls, as well as the Bank's administrative procedures and internal reporting requirements operate effectively. There are inherent limitations in the effectiveness of any system of internal control, including the possibility of human error or the circumvention or overriding of controls. Accordingly, even an effective internal control system can provide only reasonable assurance with respect to financial statement preparation.

AUDITORS' REPORT ON REVIEW OF THE INTERIM CONDENSED FINANCIAL STATEMENTS

To the Management and Board of Directors of Bank "Levoberezhny" OJSC:

Introduction

We have reviewed the accompanying interim condensed financial statements of Bank "Levoberezhny" OJSC ('the Bank') which comprise the interim condensed statement of financial position as of 30 June 2010, and the interim condensed statement of comprehensive income, interim condensed statement of changes in equity and interim condensed cash flow statement for the six month period then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and presentation of these interim condensed financial statements in accordance with International Accounting Standards ('IAS') 34 *Interim Financial Reporting*. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying accounting policies; and making accounting estimates that are reasonable in the circumstances. Our responsibility is to express a conclusion on these interim condensed financial statements based on our review.

Scope of the review

We conducted our review in accordance with International Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim condensed financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim condensed financial statements of the Bank as at 30 June 2010 and for the six month period then ended are not prepared, in all material respects, in accordance with IAS 34 *Interim Financial Reporting*.

1. Principal Activities (continued)

As at 30 June 2010 the Bank employed 795 members of staff (31 December 2009: 979).

2. Operating Environment of the Bank

After economic crisis in 2008 in 2009 the picture reversed in many ways, the Russian Rouble has appreciated strongly again, stock markets have increased substantially and commodity prices most notably gold and oil have also risen sharply. GDP which went through accelerating decline in the first half of 2009 has begun to recover and overall for 2009 was approximately 8% negative primarily thanks to gains in the second half of the year. Liquidity is still at substantially lower levels than pre 2008 but is improving, there has been widespread loan restructuring and non performing loans are believed to be peaking. Progressive cuts to the Central Bank of Russian Federation rate, from 13% to 8.75% at the end of 2009 have provided a form of stimulus and made credit more affordable and this policy is likely to continue.

In 2010 the Bank of Russia has continued the policy of slowly decreasing refinancing rate, and at the end of the period of six month 2010 the refinancing rate was 7.75%. This tendency allowed banks to decrease interest rates on loans, which consequently resulted in increase in loan portfolios. It also should be noted not only increase in the volume of loan portfolios but also in the credit quality of loans. This can be seen from the constant decrease in the portion of overdue loans, as most industries are recovering from the crisis.

Although, at the date of signing these financial statements Management, cannot fully determine the impact of the current economic situation on the Bank with any certainty it is clear that significant uncertainties are still present. The financial information reflects Management's assessment of the impact on the operations and the financial position of the Bank. The future business environment may differ from Management's assessment. They are unable to predict all developments that could have an impact on the banking sector and therefore the financial position of the Bank.

3. Basis of Presentation

a) Basis of Presentation

These interim condensed financial statements are prepared in accordance with International Accounting Standard ('IAS') 34 *Interim Financial Reporting*. As a result, they do not include all of the information required by International Financial Reporting Standards ('IFRS') for a complete set of financial statements. Operating results for the six month period ended 30 June 2010 are not necessarily indicative of the results that may be expected for the year ending 31 December 2010.

These interim condensed financial statements should be read in conjunction with the complete financial statements as at 31 December 2009.

The Bank maintains its accounting records in accordance with the Russian Accounting Standards ('RAS'). These interim condensed financial statements are based on those RAS records, as adjusted and reclassified to comply with IAS 34 *Interim Financial Reporting*.

The Bank does not have any subsidiary companies and therefore does not prepare consolidated financial statements.

Bank «Levoberezhny» (OJSC)
Notes to the Interim Condensed Financial Statements
for the six month period ended 30 June 2010
In thousands of Russian Roubles (unless otherwise indicated)

3. Basis of Presentation (continued)

b) Basis of Measurement

These interim condensed financial statements have been prepared on the historical cost convention, as modified by the initial recognition of financial instruments based on fair value, revaluation of premises and financial instruments carried at fair value through profit or loss.

c) Functional and Presentation Currency

The Bank considers the Russian Rouble ('RUB') to be its functional currency given the fact that all operations of the Bank are carried out in the Russian Federation and significant part of them and its cash flows are denominated in Russian Roubles. Management of the Bank believe this currency best reflects the economic substance of the underlying events and circumstances relevant to the Bank.

The RUB has been selected as the presentation currency for the financial statements of the Bank and amounts have been rounded to the nearest thousand.

d) Foreign Currency Translation

Transactions denominated in currencies other than Russian Roubles are recorded at the exchange rate prevailing at the date of transaction. Translation differences occurring as a result of transactions performed in foreign currencies are recorded in the statement of comprehensive income at the exchange rate prevailing on that date.

The official exchange rates of the CBRF as at 30 June 2010 were:

RUB 31.1954 for 1 USD (31 December 2009: RUB30.2442)

RUB38.1863 for 1 EUR (31 December 2009: RUB 43.3883).

e) Use of Estimates and Judgements

The preparation of financial statements in accordance with IAS 34 Interim Financial reporting requires management to make judgments, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Although these estimates are based on management's best knowledge of current events and actions, actual results ultimately may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

4. Significant Accounting Policies

The accounting policies adopted in the preparation of these interim condensed financial statements are consistent with those followed in the preparation of the Bank's annual financial statements for the year ended 31 December 2009.

8. Loans and Advances to Customers (continued)

Loans and advances renegotiated

Restructuring activities included extended payment arrangements, approved external management plans, modification and deferral of payments. Following restructuring, a previously overdue customer account is reset to a normal status and managed together with similar accounts. Restructuring policies and practices are based on indicators or criteria that, in the judgement of management, indicate that payment will most likely continue. These policies are kept under continuous review.

Renegotiated loans that would otherwise be past due or impaired comprised:

	<u>30 June 2010</u>	<u>31 December 2009</u>
Individuals (retail customers)		
Consumer loans	420	491
Mortgages	47,047	44,541

19. Contingencies and Commitments

Legal proceedings

In the normal course of business, the Bank receives claims from customers. Management of the Bank does not consider that legal proceedings might lead to substantial losses therefore there is no need in creating a provision in this respect in the financial statements.

Tax legislation

Due to the presence in Russian commercial legislation, and tax legislation in particular, of provisions allowing more than one interpretation, and also due to the practice developed in a generally unstable environment by the tax authorities of making arbitrary judgement of business activities, management's judgement of the Bank's business activities may not coincide with the interpretation of the same activities by tax authorities.

If a particular treatment was to be challenged by the tax authorities, the Bank may be assessed additional taxes, penalties and interest, which can be significant. Tax years remain open to review by the tax authorities for three years.

Capital commitments

As at 30 June 2010 and 31 December 2009 the Bank had no material capital commitments.

Credit related commitments

Credit related commitments comprise loan commitments and guarantees. The contractual amount of these commitments represents the value at risk should the contract be fully drawn upon, the client defaults, and the value of any existing collateral becomes worthless. Outstanding credit related commitments at their nominal amounts are as follows:

	30 June 2010	31 December 2009
Undrawn overdrafts	488,540	297,190
Undrawn loan commitments	10,296	3,451
Guarantees issued on mortgages sold	3,122	14,424
Other guarantees issued	185,182	154,062
	469,127	469,127

Management evaluated the likelihood of impairment in respect of other credit related commitments in 177 as at 30 June 2010 (31 December 2009: 3,391). The total outstanding contractual amount of loan commitments and guarantees does not necessarily represent future cash requirements, as these financial instruments may expire or terminate without being funded.

20. Related Party Transactions

For the purposes of these financial statements, parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions as defined by IAS 24 "Related Party Disclosures". In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

21. Capital Management

Among the main objectives of the management of capital are the following:

- § Comply with capital requirements regulated by the CBRF,
- § Support the Bank in functioning as a going concern.

The compliance with the capital adequacy ratio required by the CBRF is monitored through monthly reports checked and approved by the General Director and the Chief Accountant of the Bank. The following other targets of capital management are daily monitored:

21. Capital Management (continued)

- § Participation in the deposit insurance scheme and corresponding to the quality of capital recommended by the Agency of insurance scheme;
- § Increasing the amount of active operations of the Bank;
- § Controlling the ability to finance long-term investments.

The CBRF sets and monitors capital requirements for the Bank. Currently banks have to maintain a ratio of capital to risk weighted assets, the total capital ratio, computed under CBRF reporting, above the prescribed minimum of 10% (2009: 10%).

Further, the State Deposit Insurance Scheme requires banks to maintain a total capital ratio under such reporting exceeding of 11%. The Bank complied with these limits during the year and preceding year. The capital ratio of the Bank was, at 30 June 2010 16.1% (31 December 2009:19.7%)

The Bank's primary aim with regard to capital is to meet these requirements.

The Bank also periodically calculates capital in accordance with international guidelines. Its chosen measure for this is to calculate in accordance with the Basel Capital Accord, originally published in 1988, subsequently known as 'Basel I'. Basel I includes definitions of items comprising capital and a structure of risk weights to be applied to assets to give risk weighted assets. It therefore only takes account of credit risk with no allowance for market or operational risk. It was adopted by many countries in amended or non-amended forms and the Bank applies the original guidelines not adjusted to any country specific scenario. Subsequent amendments including Basel I and II have not been applied.

The capital adequacy ratios in accordance with the Basel I were as follows:

	30 June 2010	31 December 2009
Tier 1 capital		
Share capital	549,956	549,956
Retained earnings	901,173	654,673
Total tier 1 capital	1,451,129	1,204,629
Tier 2 capital		
Revaluation of fixed assets	175,905	178,305
Subordinated loan	-	14,000
Total tier 2 capital	175,905	192,305
Total capital	1,627,034	1,396,934
